| CONCLUSION | 69 |

Kerala Institute of Medical Sciences (KIMS), Trivandrum, was established in 2002 as a center of excellence in medical care and post graduate medical education. Within two years of starting, National Board of Examinations (NBE) recognized the merits of qualifications of our faculty as well as the excellent facilities of the hospital and granted permission to start DNB in Cardiology and Radiology. Within a span of 14 years, we have become one of the largest private Post Graduate Medical Institutions in the country with 21 departments having Post Graduate programmes.

We firmly believe that continuing medical education (CME) and research activities are building blocks for better patient care. We conduct regular International, National and State level CME programmes with credit hours of Travancore-Cochin Medical Council and provide immense support to faculty members and students in carrying out various research activities.

This report gives detailed department wise account of the CMEs, publications, paper presentations and participations in various conferences. It also gives a brief account of the speciality training/courses offered and hosted by KIMS to International students. We are very happy that SOCOMER acted as a catalyst in improving the quality of medical standards in our institution.
